

Online Groundwater Monitoring Solution

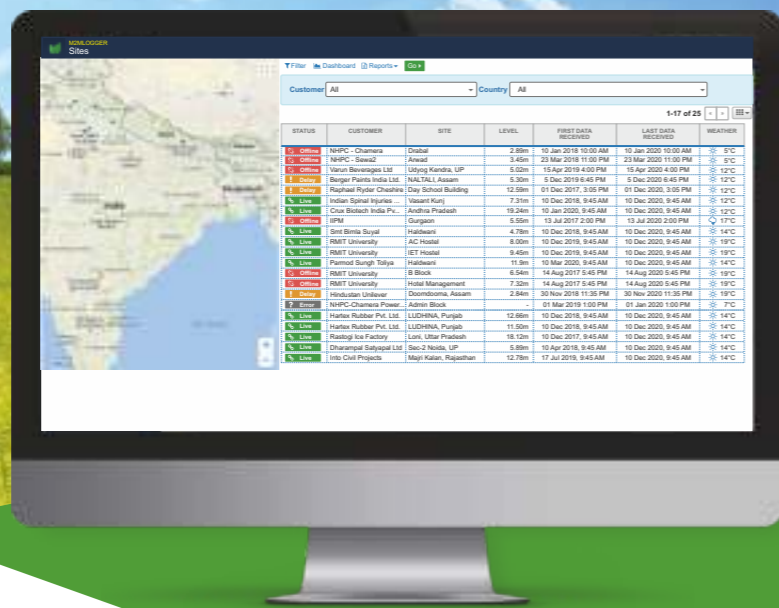

m2mLOGGER[®]
remote monitoring eco-system

Why need Groundwater Monitoring?

- India is the largest groundwater user in the world, using 25% of all groundwater extracted every year globally.
- Major component of the groundwater extracted, is used in the irrigation sector, followed by domestic use and lastly industrial use.
- Groundwater Monitoring is essential for accurate mapping of resources, its usage and replenishment cycles.

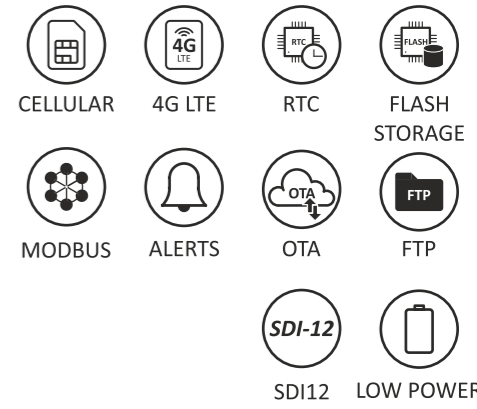

EZLink EVO series

For Water Level

- 4G LTE
- Cloud Connectivity
- Local Data-storage
- Inbuilt RTC
- MODBUS RTU RS485
- SDI12 Inputs
- Maintenance free with Long battery life

The most **efficient** and **transparent** way to meet regulatory compliance!

Features

- Compliant with CGWA guidelines
- Regulatory reporting
- Preemptive alerts for preventive maintenance
- Email / SMS alerts for threshold conditions.

Compatibility

EZLink 4G series

For Water Level & Flow-meters

- 4G LTE
- Cloud Connectivity
- Local Data-storage
- Inbuilt RTC
- MODBUS RTU RS485
- Weather Sensor Inputs

Testimonials

“

PRITESH M. SHAH
Chairman, PRIMA Group

We are working with M2M Loggers for around 6 years now, and every step of the way they have developed and provided IoT solutions to meet our Real Time Data Transmission requirement.

MANAS BABYLONI
General Manager (Sales & Strategy), Errand Enterprises Pvt. Ltd.

M2MLogger has helped us service our customers with the latest IoT technology. They have helped us stay ahead of competition by developing new innovative IoT solutions for the industry.

SURAJ CHAWLA
General Manager, NEVCO Engineers Pvt. Ltd.

We were looking for advanced IoT gateways to help us with evolving customer requirements when we evaluated M2MLogger. Their IoT gateways and SAAS cloud platform provided a seamless and integrated solution to our problem. M2MLogger support team helped us to build confidence with our customers and a stronger relationship.

AVISHEK SINHA
Director, Srijan Webmatics Pvt. Ltd.

Struggling with bad experience with existing IoT products, we were referred to M2MLogger. Their equipments integrated easily and are highly maneuverable which made them easy to deploy for targeted monitoring when and where we need it.
